PROFESSIONAL OBJECTIVE

Software developer with experience in web projects and application security, working with PHP, Laravel, Node.js, React. Seeking opportunities to apply my technical skills, collaborate in agile teams, and contribute to the development of scalable and secure solutions. I am committed, diligent, and proactive, and aim to add value and grow with the company.

ACADEMIC BACKGROUND

COTEMIG: Technical High School in Informatics and Technology, Feb 2021 - Dec 2022
PUC Minas: Analysis and Systems Development - (Expected completion: Jul 2026)

PROFESSIONAL EXPERIENCE

Bigmidia - Developer Intern
Feb/2022 - Aug/2022
- Developed new functionalities for the web system.
- Maintained systems and corrected bugs.
- Utilized PHP, Yii2, JQuery, MySQL.

Construsite Brasil - Junior Web Developer
Feb/2023 - Mar/2024
- Utilized PHP, JQuery, Laravel, Docker, and MySQL for maintenance and development of new functionalities for the company's systems.
- Worked on real projects and used agile methodologies like Scrum.
- Applied numerous programming concepts such as Clean Code, MVC, REST, etc.

Symplicity Brasil - Application Security Intern
Sep/2024 - Aug/2025
- Worked as an application security intern, developing and maintaining security-related functionalities.
- Utilizing PHP, MySQL, and JavaScript.
- Collaborated with international teams, using English as the primary means of communication.

Tenacity Tecnologia - FullStack Developer
Aug/2025 - Present
- Works as a Fullstack developer contributing to the creation of modern and high-performance web pages.
- Primarily uses Laravel, Typescript, MySQL, Clean Code, Rest, among others.

PROJECTS AND PROGRAMMING EXPERIENCE

"InTime" - School attendance control system (Academic project)
- Worked with my group on the development of a project for COTEMIG Startups with the aim of automating school attendance control.
- Winning project of cotemig startups in 2023.
- Utilized Typescript, NodeJs, React, Trello, Git, GitHub, Prisma ORM.
- Responsible for developing the major part of the API in Typescript.

"DreamsLab" - Stock management and order control (Academic project)
- Developed as a final project for the first semester at PUC Minas, designed to facilitate stock control and order management for bakeries.
- Highlighted project of the first semester of 2024.
- Project developed entirely in HTML, CSS, and JavaScript, with a database using Google Firebase.
- Responsible for completely developing the JavaScript, Firebase, and a large part of the HTML and CSS.

"PHP RestAPI" - Advanced and functional API Template (Personal project)
- Developed for studying design patterns with PHP, bringing advanced and current concepts using pure PHP, built from scratch, with documentation and code following current patterns and best practices.
- Project developed entirely in PHP and MySQL for the database.
- The project features a dynamic routing system, request validation, security patterns, and other functionalities.
